

## **CEREAL BOX KIBBLE DISPENSER**

Empty cereal boxes can act as kibble-dispensing devices and also provide the ripping and tearing that some dogs enjoy.

### **Materials:**

- Various sizes of empty cereal boxes or other boxes
- Variety of treats or kibble
- You can also use fresh, crunchy fruits and vegetables, such as apples, large carrots, and cucumbers

### **What to Do:**

1. Nest three to four boxes, place kibble/treats inside each box
2. Close the tops as you go
3. Also layer kibble/treats in between each layer of boxes

Remember to remove the plastic pouch from the cereal box first!

For various breeds try different sizes of boxes such as small gift boxes or large packing boxes
