Natasha Drain, MS
Research Assistant
Shelter Research & Development
ASPCA

Why this series...

- The risk of being a shelter cat
- Why learn to read body language?

<http://favim.com/image/502020/>

Next in the series

- Humane Feline Handling (April 9)
- Shelter Cats: Intake to Adoptions (April 23)

Photo: Meg Allison

Where are we going today?

- Words matter
- Feline body language
- Using your body to communicate with cats

Photo: Aryn Steres

Why is this important?

- 80% of vet staff will get bitten by cats.
- Shelter cat quarantine issues
- Cage presentation

A quick poll – answer in the chat

My organization.....

- A. Provides ongoing, hands-on training in safe and humane feline handling, housing, and welfare for all staff, officers and volunteers.
- B. Provides basic training in safe and humane handling and housing at the time of hire only.
- C. Trains staff, officers and volunteers by having us shadow others and/or learn by trial and error.
- D. Training? We're warned not to get bitten...does that count?

Words matter

OBJECTIVE - not influenced by personal feelings, interpretations, or prejudice; based on facts; unbiased: *an objective opinion*.

- Think: “just the facts” - police **O**fficer

Shakespeare

SUBJECTIVE - based on or influenced by personal feelings, tastes, or opinions: *his views are highly subjective*

- Think: creative writing - **S**hakespeare

Objective or Subjective?

The rock is taller than the vegetation.

Objective or Subjective?

These boots are old and tired.

lapam04.deviantart.com

Objective or Subjective?

This cat's tail is above spine level.

Objective or Subjective?

This friendly cat is waving “hello”

Feline Body Language

- Body parts
- Postures
- Putting it all together
(movement and context)

Photo: Meg Allison

Behavior is on a spectrum

Terminology – arousal

Ears

Relaxed

Alert

Ears – startled, fearful, defensive threat

Eyes – shape

Eyes – pupils

1

2

3

5

4

Eyes – direction of gaze

1

2

3

Blinking

Whiskers

1

2

3

4

5

6

Mouth

- Relaxed
- Open
- Flehmen
- Teeth exposed
- Panting
- Vocalizing

1

2

3

5

4

Photos: Meg Allison

Vocalizations

- Meow
- Purr
- Chirp
- Chatter
- Hiss
- Growl
- Yowl
- Spit

Excitement/arousal
(usually predatory)

Paws

- Kneading
- Tense
- Tucked
- Marking
- Paw raise
- Claws exposed
- Defensive threat

What is this cat doing?

Tails

1

3

2

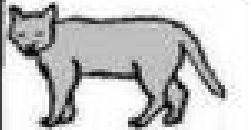

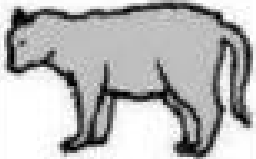

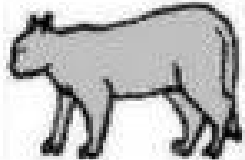

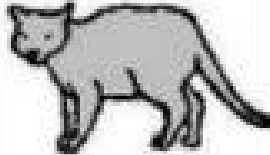

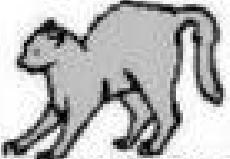

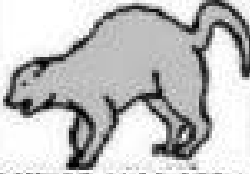

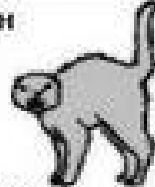

4

Tail movement

- Twitching
- Lashing
- Quivering
- Wrapped

Body postures

	<div> <div></div> <div>← MORE AGGRESSIVE →</div> </div>			
<div> <div></div> <div>MORE SUBMISSIVE OR MORE FEARFUL</div> <div></div> </div>	 TAIL MAY BE HELD ALOFT			
		 FLATTER TO THE GROUND		
	 "FLINCH" MAY EVEN FALL OVER IN SUBMISSIVE FEAR		 MUSTN'T CONFUSE THIS WITH STRETCHING	 POSTURE ALSO SEEN WHEN CATS SPRAY
	 TOTALLY WITHDRAWN TAIL TUCKED UNDER	 TAIL TUCKED UNDER		 LAST DITCH SCARED ANGRY

Modified from "Cat Behavior: The Predatory and Social Behavior of Domestic and Wild Cats" by Paul Leyhausen 1979

Body postures

Relaxed

Tense/fearful

Aroused/defensive

Defensive threat posture

Body tension

Where's the weight?

forward

centered

back

Rolling

Grooming

Bunting

What's going on here?

What's going on here?

Feigned sleep

Using your body to communicate

- Working with unknown cats
- Important to appear non-threatening

Talk to the cat first

Your body posture

- Turn to side
- Move slowly
- Bring hand from underneath

Blink

- Affiliative signal that you can use too
- Avert eyes
- Look away

First contact

1

2

3

4

Cats and belly rubs

Scent

- Perfume
- Cigarettes
- Dog smells
- Other cat smells
- Pheromones

Escape routes

- Try not to trap cats
- Choice
- Feral box, paper bag

Putting it all together

What have we learned?

- Basic cat body language
- How to use our body language to communicate with cats

What's one new thing you're going to look for or try after this webinar?

Thank you!
