

DIY Treat Balls – For Rabbits, Birds, Rats and other Small Animals

Treat balls can be used for all small animals and birds, and can be filled with a variety of treats appropriate to the species.

Supplies Needed:

- Scissors
- Empty toilet paper or paper towel roll
- Treats
- Rope/string (only if you want to hang the treat ball)

Take an empty toilet paper roll and cut it into even rings, about 0.5” each. Then place them inside each other criss-cross style to form a ball. Place a treat inside, such as a slice of banana, or nuts.
