

DIY Treat Rollers – For Rabbits, Birds, Rats and other Small Animals

Treat rollers can be used for all small animals and birds, and can be filled with a variety of treats appropriate to the species.

Supplies Needed:

- Empty cylindrical cardboard container (with lid)
- Scissors

Punch 10-15 penny sized holes all around it the container, add dry treats small enough to fit through the holes, and close the lid. This makes a great first treat “puzzle”! If the puzzle seems to challenging, or becomes frustrating for the animal, make the holes a little bigger.
